

MGA NEEDS YOU!

Would you like help beautify our campus? Would you like to raise awareness of recycling? If so, MGA wants you to help by making a leaf from trash and using it to create a collaborative art project that enhances the beauty of our campus.

From March 16 -30 save your everyday trash and bring it to the Arts building atrium. There you can help us grow our Intention Tree project for the MGA Art Festival Spring 2026
Nature's Wonderland: The Beauty of the South

The branches of our beautiful tree are assigned to the different programs in SoAL, participate and show your program's engagement with this public project, while becoming aware of the positive effects recycling your everyday trash can have in the environment.

Make as many leaves as you want. Recycle our daily life and collaborate with this project as the big MGA family we are.
