

## Intention Tree Instructions

Save and recycle any kind of wrapping, box, container, plastic bottle, or bendable material that you would normally dispose of. Just make sure that it has any of the following colors:

- Green
- Orange
- Yellow
- Brown

1. Cut a leaf shape of about 4-5 inches long.

2. Make a small perforation on the stem side, and if the material is too flimsy, make another perforation on the other end of the leaf.

3. **Walk carefully over the mesh** and using a twist tie (we will provide those for you), tie your leaf to the mesh of our beautiful, recycled tree, and **hide the end of the wire** on the back of the leaf. Be careful not to scratch yourself with the wire in the twist tie.

Make as many leaves as you want. Recycle our daily life and collaborate with this project as the big MGA family we are.
