## Class Progress

How valuable would it be to have predictive practices in place so that you can access early warning about students who may be getting off track? The Class Progress tool provides instructors with a high level view of student performance across the entire class and through four indicators of performance all at the instructor's fingertips making predictive practices and preventing student disengagement a priority. Access the Class Progress tool via the User Progress tool.

## Four Indicators of Progress

Each course can select four indicators of progress for which they can use to monitor how students are performing in their class. These progress indicators can be easily changed or reordered. Each indicator has a visualization to highlight overall progress, recent activity, and calls attention to areas of concern, so instructors can develop plans for getting students on track.

## Indicators

Instructors can hover over a visualization to get more details. Clicking an indicator allows instructors to drill into the details of tool progress for the user in the course, and is an entry point into User Progress where they can look at summaries and details of tools, navigating between users and courses if they have permission.

Available Indicators include:

- Content
- Objectives
- Grades
- Login History
- Discussion
- Surveys
- Assignment
- Quizzes
- Checklist
