

MGA

Academic Program - Course Schedule and Learning Outcomes

Campus: Cochran

College/School: School of Health & Natural Sciences

Department: Rehabilitation Science

Academic Degree: M.S.

Major: Occupational Therapy

Track (if applicable):

What are the Program Learning Outcomes?

A learning outcome is a description of the knowledge, skills and abilities you will gain as you complete your coursework.

1. Demonstrate the ability to function as competent entry level professionals in a variety of settings, including traditional and non-traditional or emerging settings.
2. Analyze the impact of environmental, cultural, and socioeconomic influences on human development and occupations throughout the life span, while exhibiting an appreciation for diverse cultures, lifestyles and ideas.
3. Demonstrate values, attitudes, and behaviors congruent with the occupational therapy profession's values, philosophy, standards, and code of ethics.
4. Recognize the importance of, and the ability to effectively utilize occupations, with individuals, groups, and populations throughout the lifespan.
5. Recognize the importance of scholarship and evidence-based practice to the profession and demonstrate a desire for lifelong learning.
6. Demonstrate the ability to collect, analyze, synthesize, and apply relevant information in a variety of contexts using the best available scientific evidence.
7. Demonstrate the ability to employ clinical reasoning/critical thinking, along with the best available scientific evidence, in order to establish and modify interventions.
8. Demonstrate appropriate professional behaviors, including effective oral, written, and interpersonal communication skills, as well as cultural sensitivity and humility.
9. Demonstrate the ability to function as occupation-based promoters of health, wellness, and prevention.
10. Demonstrate the ability to advocate for clients/consumers, as well as for the occupational therapy profession.

What courses do I need to take to graduate from this program?
