What are the Program Learning Outcomes?

A learning outcome is a description of the knowledge, skills and abilities you will gain as you complete your coursework.

1. Analyze a complex information system problem to apply principles of information technology and other relevant disciplines to identify solutions.

2. Design, implement, and evaluate an information system solution to meet a given set of information technology requirements.

3. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

4. Identify and analyze user needs and to take them into account in the selection, creation, integration, evaluation, and administration of computing-based systems.
