Enhancing progression through the Health Services Administration program is of chief significance for the department chair and faculty. In support of Middle Georgia State College's Complete College Georgia (CCG) initiative, Health Services Administration seeks to reduce the number of credit hours at graduation by allowing transfer students the greatest opportunity to utilize credit towards degree completion. The department has included additional courses in Area F to align with other programs within the School of Health Sciences. Furthermore, students may use up to 12 credit hours of outside electives in AREA F. Additionally by accepting courses such as but not limited to BIOL 1114, 1124, and 1134; the department creates a pathway by which students who fail to get into competitive degree programs may still pursue a degree in a health profession field of study.
