

Identifying ePortfolios as a High Impact Practice for Inclusion in Banner

What is a High Impact Practice?

The American Association of Colleges & Universities has established a set of High Impact Practices that encourage postsecondary institutions to adopt and scale. High Impact Practices are teaching and learning practices that have been widely tested and have been shown to be beneficial for college students from many backgrounds. These practices take many different forms, depending on learner characteristics and on institutional priorities and contexts.¹

Guidelines for Qualifying an ePortfolio as a High Impact Practice

The University System of Georgia (USG) institutions should consider the following guidelines as they engage in a review process to identify whether an ePortfolio should be categorized as a High Impact Practice in the Banner Student Information System. The guidelines were developed in consultation with USG institution representatives involved in the implementation of ePortfolios. These guidelines expand upon those articulated by the American Association of Colleges & Universities to provide just-in-time answers for USG institution faculty:

Characteristics of ePortfolios as a High Impact Practice²

- Designed to be owned and developed by the student learner with guidance from faculty and other educational professionals
- Learner reflection, upon not only the artifacts or instances of learning assembled in the ePortfolio, but also upon their process of learning that exhibits the desired outcomes at required levels of competence
- Performance expectations set at appropriately high levels
- A significant investment of time and effort over an extended period of time.
- Interactions with faculty and peers about substantive matters
- Experiences with diversity, wherein students are exposed to and must contend with people and circumstances that differ from those with which students are familiar
- Feedback is frequent, timely and constructive
- Periodic and structured opportunities for students to reflect on and integrate learning
- Opportunities to discover the relevance of learning through real-world applications
- Public demonstration of competence

Identifying ePortfolios for Inclusion in Banner

Institutions have the sole authority to establish a process and criteria for the review of ePortfolios to determine if they qualify as a High Impact Practice. The USG does *not* make the

determination but provides these guidelines to promote system-wide consistency. The institutional process for qualifying as High Impact Practices may include a review committee of faculty and teaching staff at the college or academic department level. Institutions should consider developing a process for faculty to submit for review. Review committees can determine the nature of the application process to approve course artifacts that should be included in the review process. Artifacts might include a course syllabus and lesson plan. With the assistance of the Guidelines for Qualifying ePortfolios as a High Impact Practice, each institution will develop its own criteria qualifying a course. The final decision for approving ePortfolios as a High Impact Practice rests at the institution-level.

The institution may qualify non-course, non-credit based experiences as High Impact Practices. Campuses have the discretion to identify these experiences in Banner as a non-credit based course option in a manner that is consistent with institutional practice. If non-course, non-credit based experiences are entered into Banner, they must use the High Impact Practice codes included in this document.

Banner Code Categories

The Banner Codes for qualified ePortfolios will include the following categories:

Primary Codes: Must have one primary code

Code	Description
ZEPP	ePortfolios meet institution's criteria as a High Impact Practice for ePortfolios MGA defines ePortfolios as: ePortfolios enable students to electronically collect their work over time, reflect upon their personal and academic growth, and then share selected items with others, such as professors, advisors, and potential employers. Because collection over time is a key element of the ePortfolios process, employing ePortfolios in collaboration with other high-impact practices provides opportunities for students to make connections between various educational experiences. (Source: https://www.aacu.org/leap/hips)

Required Course Codes: For each course section that meets the following institution criteria

Code	Description
ZHIR	Course meets a High Impact Practice requirement established by institution.

The following scenarios must be met in order to successfully pass the data validations in Banner.

- Each course section must have one primary code.
- Each course section must include a code to indicate it is a required course by the institution, if applicable. If not, leave blank.
- Each course section must use all required course codes if the course meets the criteria associated with the code.
- Campuses have the option to develop additional institution-based codes and establish criteria for using the codes for their ePortfolios.

Primary Code

ePortfolio meets institution's criteria as a High Impact Practice for ePortfolios

Required Course Code

Course section meets a High Impact Practice requirement established by institution.

Courses that meet an institutional requirement that graduates complete a minimum number of or non-course-based experiences designated as a High Impact Practice. The requirement, to include the type and number of student experiences, is determined by the institution.

The USG may add additional codes, as necessary.
