# **ENDNOTES OR FOOTNOTES**

In addition to a bibliography at the end of your paper, you need to include a note (endnote or footnote) each time you use a source. Footnotes are added at the end of the page on which the source is referenced, and endnotes are compiled at the end of each chapter or at the end of the document.

In either case, a superscript number corresponding to a note with the bibliographic information for that source should be placed in the text following the end of the sentence in which the source is referenced.

This provides context for source material.
