

Connect Using WPA2-Enterprise in Apple Mac OS X

1. Click the wireless icon in the top right corner of your desktop to bring up available connections.

2. Select “MGANet-Secure” and click “connect.” If you are in the dorms, select “ResNet-Secure.”
3. You will be prompted for a username and password. Enter your MGA email address and password and click “Join.”

4. When prompted with “Verify Certificate,” click “continue” to save the DigiCert Global Root certificate to your “Trusted Root Certificate Authorities” list.

5. When prompted to make changes to your “Certificate Trust Settings” enter your local computer username and password. This is not the same username and password used step three.
